

## Awfis

### Problem

- ✓ Leading coworking space companies with 55+ centers and 25000 seats
- ✓ Offer lightning-fast Internet service to its customers over Aruba network
- ✓ Needed reliable and scalable authentication, provisioning and NMS
- ✓ Integration with LDAP service and intelligent bandwidth management

### Solution

- ✓ Deployed wireless NAC controller for handling user authentication and provisioning
- ✓ Integrated NAC with enterprise LDAP/AD service for authenticating users
- ✓ Central policy management to ensure consistent rules and restrictions
- ✓ Tracking of bandwidth consumption, user activity and network endpoints

### Result

- ✓ Entire network across 55 offices was brought under single console management
- ✓ IT administrator had consistent, unified view of network activity
- ✓ Reduced network outages and downtime significantly
