

Delhi Metro

Problem

- ✓ Largest metro network in India covering 250 stations and serving 1.8 passengers each year
- ✓ Wanted to offer free WiFi service on the metro stations for limited time
- ✓ Handle load of 25,000 concurrent users with zero downtime
- ✓ Solution for monetizing through ads, surveys, promotions and marketing

Solution

- ✓ Deployed UniBox and WiFiLAN solution for managing the entire WiFi infrastructure
- ✓ Handled traffic from over 1000 access points and served over 1 million users daily
- ✓ Implemented WiFi security and regulatory compliance
- ✓ Highly secure and failsafe architecture to provide 99.9% uptime to the commuters

Result

- ✓ System handled 1 million login session daily
- ✓ Over 5 million registered users
- ✓ Project received lot of media coverage and accolades from government and authorities
