Microsoft

Problem

⊘ Wanted to setup campus WiFi for employees and visitors

⊘ Offer WiFi on buses for employees during commuting

⊘ Needed to enforce multiple security layers to protect sensitive data

⊘ Verify employees against active directory before allowing access to corporate WiFi

Solution

⊘ Installed Unibox controller for employee and guest WiFi access

⊘ Captive portal was built and integrated with local active directory service

⊘ Employee usage was tracked and recorded for compliance with corporate rules

⊘ 4G WiFi router was installed on the buses to provide seamless connectivity while commuting

Result

⊘ Employees started working on the shuttle buses thus increasing their productivity

⊘ Corporate WiFi network was fully managed centrally and monitor on regular basis

⊘ 30% improvement is employee satisfaction
